Time Travelers

| By Laurie Kable |

Whether you order up a G6 or fly commercial, a slick new fleet of travel watches will keep you on schedule from Singapore to St. Barth's—without missing a beat back home. F.P. Journe, Vacheron Constantin and Blancpain are just a few luxury watchmakers that have upgraded their multi-time zone technology in stunning pieces that are remarkably easy to navigate. The science behind these men's styles may be sophisticated and complex, but the classically chic designs are elegant enough for a woman's wrist. Now, if only they could take the edge off jet lag. **Q**
